OCME PEGASUS DEPALLETIZER

RIF
U25.066-DEPAL

MODEL
PEGASUS F160

BRAND
OCME

CATEGORY
DEPALLETIZER

OCME Pegasus Depalletizer, a high-performance robotic solution for depalletizing operations dedicated to wrap-around boxes. Pegasus allows the depalletization of pallets containing bottles or cans, safely transferring layers of product onto the production line.
The robotic gripping head removes the layer from the pallet and places it onto the feed conveyor; from there, the containers are separated and aligned on single-line conveyors, ready for the next processing stages.
Thanks to the **Siemens PLC and HMI**, the system offers an intuitive interface and full control of all operational functions. Available used and overhauled by BBM, in “as-is” condition, with the option to supply compatible spare parts as a sales add-on.
The Pegasus model stands out for:
- The ability to depalletize multiple codes simultaneously, with flexible configurations;
- Reduced downtime thanks to easy maintenance and integrated Siemens control;
- Maximum precision in product handling and optimization of line-start flows.

Year of construction	2004, 2004
Max speed	40000
Current size (ml)	330 ml
Container material	Can, Glass, Pet
Worked product	Alcoholc Drinks, Beer, Canned Products, Milk, Oil, Soft Drinks, Sparkling Water, Still water, Wine
Type of products to palletize	Packs/crates
Machine condition	As It is, Overhauled and Guaranteed, Ready-to-use With Compatible Spare Parts
Warranty	6 months

Where to audit	BBM Showroom – Lenna (BG)
Electrical Power	400V 3 Ph +T
Power	30 kW
HMI	Siemens
