STRETCH WRAPPER

The **TOSA wrapper** from 2004 is a rotary arm wrapping machine designed to ensure impeccable stability of palletized loads. Equipped with a top sheet dispenser, this system reaches a **productivity of up to 12,000 bottles/hour** and is compatible with 1000×1200 mm pallets.

The machine is available in three configurations:

- As-is, ready for purchase in its current condition.
- Overhauled and guaranteed, completely refurbished by our technicians with a 6-month warranty.
- Tested and equipped with compatible spare parts, ready for production.

The Siemens PLC and HMI ensure precise control and an intuitive interface for the operator. The wrapper can be viewed at our BBM headquarters in Lenna.

Pallet wrappers, also known as **stretch wrappers** or pallet wrapping machines, wrap the load with stretch film to stabilize, protect, and compact it, facilitating storage and transport. This process prevents products from shifting or falling off the pallet, ensuring a unified, stable, and safe package against dust, moisture, and impacts.

Why choose a used and refurbished TOSA wrapper:

- Proven reliability: TOSA machines are known for their strength and long-lasting performance.
- BBM guaranteed quality: refurbished by our expert technicians.
- Significant savings compared to purchasing new equipment, without compromising on performance.

Ready to use: machine available immediately, viewable and customizable according to production needs.
