

BUSINESS PRESENTATION
PICK&PLACE
DEVELOPED
BY BBM

BY YOUR SIDE IN PACKAGING

BBM PACKAGING offers tailor-made pick&place devices for boxing, for the creation of multi-layers formats, for products handling or boxing, and for the packaging process automation.

The Pick & Place systems are compact and versatile solutions for the handling of several products; they are used to create multi-layer configurations, for the handling/transfer or inserting products into trays, boxes, blister packs, etc. **Each pick and place is customized for the product to be treated and for the required application, ensuring the necessary flexibility for every application.**
