

## The exceptional transport of a bottling line

### Beyond a simple transport.

The bottling line completely overhauled by BBM Service traveled over 350 km to reach the Acqua S. Bernardo plant in Garessio (Cuneo).

The exceptional transport operation was part of the project to install a 28,000 bph PET bottling line at the San Bernardo Spa plant. BBM designed the line layout and sold the used bottling line.

Thanks to the consolidated collaboration with an exceptional partner, Tarotrans Srl, BBM has completed an incredible loading and transport operation of machinery. **In less than 12 hours, BBM loaded the line's machinery onto Tarotrans' trucks, totaling more than 10 tons.** At 22.00, four trucks used for exceptional transport left Lenna with destination Garessio.
