

# Complete Service For Santa Vittoria

## Dismantling and withdrawal of the disused line, assembly and start-up of the new line

### CUSTOMER NEED:

In 2022, Santa Vittoria requested the expertise of BBM Service for the preparation of a new production line, destined to increase the potential of the Pornassio plant.

### CONSERVATIVE DISMANTLING AND WITHDRAWAL OF THE DISUSED LINE

In just seven days, BBM technicians dismantled and collected the complete 15,000 bph PET line, managing its transfer to our warehouse in Lenna. Here, the machines have been completely overhauled, in order to make them performing again.

### ASSEMBLY AND START-UP OF THE NEW LINE

We the spaces and equipment of the construction site. Thanks to this expertise, we have actively assisted the supplier's technicians, acting as contractor, to coordinate the assembly and start-up activities of the machines. We did not only deal with the technical aspects: we also dedicated ourselves to the management of safety on site and waste disposal. In less than a month, the new bottling line (SMI supply) is complete. The result is a complete line that reaches a production capacity of 25,000 bph. The line bottles still and sparkling water in four different formats.
