

COMPANY PRESENTATION

**MAINTENANCE
OVERHAUL
AND ASSISTANCE**
FILLERS, RINSERS
AND CAPPERS

BY YOUR SIDE IN PACKAGING

We are specialized in the maintenance of bottling and packaging machines, providing technical assistance and thanks to a large warehouse of spare parts compatible with the machinery of the main manufacturers.

BBM IS ABLE TO OFFER MAINTENANCE SERVICES ON FILLING MACHINES FROM DIFFERENT MANUFACTURERS.

The BBM Service team, with over 50 qualified technicians, intervenes at the customer's bottling plant both for scheduled maintenance and for urgent interventions, **ensuring minimum machine downtime.**

MAINTENANCE

OVERHAUL

ASSISTANCE

WHY US

ASSISTANCE GUARANTEED

We guarantee assistance, including telephone. **In a short time, we restart your system, minimizing downtime**

SPEEDNESS AND FLEXIBILITY

We are a valid alternative to manufacturers of the sector. Our technicians can work on shifts and holidays

COST SAVINGS

In addition to having advantageous rates compared to manufacturers', **we optimize machines by reducing production costs**

GUARANTEE OF RESULTS

On the interventions carried out and the spare parts provided, we guarantee optimal results. **The formula satisfied or refunded applies**

WHAT WE DO

MAINTENANCE FILLERS

Disassembling, service and re-assembling the parts subject to wear of a filler, such as seals, washers, bushings on valves and manifolds.

Disassembly and a complete overhaul of the wearable parts of the machine. With our technicians we can work at the customer's premises or disassemble pieces and take them to our workshops in San Pellegrino and Lenna, depending on the customer's needs, always guaranteeing minimum downtime.

BBM offers both immediate technical support services, to solve a current problem as soon as possible and in the best possible way, and preventive maintenance programs to maintain the performance of the machinery.

MAINTENANCE, OVERHAUL, AND ASSISTANCE
FILLERS- BBM

35%

of failures occurs due to lack of maintenance.

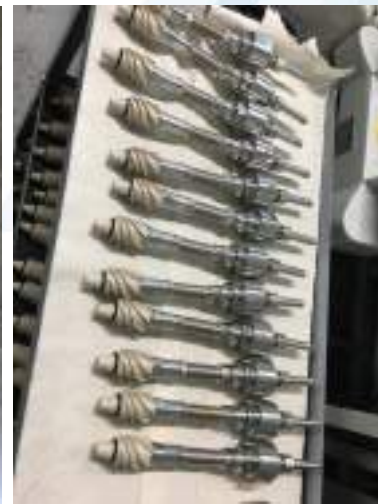

A periodic check of the machinery and a preventive action allow to minimize the problems due to wear, thus delaying the investment for a new machine.

MAINTENANCE EXAMPLES

KRONES VALVES

In addition to dismantling and completely overhauling the worn parts of fillers, rinsers, and cappers, our specialized technicians propose the carrying out of **innovative upgrades to reduce energy consumption and costs**, or the supply of format change kits even for the most complex processes, such as degorgement.

SPARE PARTS SALE

Very efficient and fast spare parts service, in order to minimize the inconvenience associated with line stops of production.

Next to our maintenance service, BBM can also supply spare parts such as seals, springs, bushings, rollers, valves.

The most common spare parts are already in stock in BBM's warehouse, thus solving the current problems of raw material supply. For more specific parts, our engineering department can realize special studies.

CERTIFIED QUALITY

All our spare parts are tested in a certified laboratory. We carry out destructive tests to verify the composition of the materials and treatments

EXPEDIENCE

The strength of our spare parts is a competitive value for money: our sales department offers lower list prices, spare parts kits, loyal programs and fast deliveries at no extra cost

WHAT WE DO

SALE OF USED GUARANTEED

A careful selection of filling machines and other cutting-edge machinery for the packaging of food and beverage.

In addition to maintenance and assistance services, we offer the possibility of purchasing perfectly regenerated, used filling machines. Our highly qualified staff regenerates the machines putting them in a position to return to operation, reducing purchase costs, and guaranteeing you an excellent product as well as the assistance you need. A showroom of over 10.000 m2 is available to view the models of interest and follow the revision at every stage.
