

NÖM MILCH

Custom packaging solution, integrating a used clusterizer and an innovative divider into the line.

CUSTOMER NEED:

NÖM, an Austrian dairy company committed to sustainability, needed a milk packaging system that could handle 1×3 and 2×2 cluster formats, maintain a speed of 12,000 bph, and optimize the limited space in its facility.

BBM SOLUTION:

BBM provided NÖM with a used and refurbished SMI clusterizer, equipped with a custom divider that allows quick format changes between 1×3 and 2×2, maintaining a speed of 12,000 bph. The divider, designed to minimize space requirements, also ensures ease of maintenance and safety, and can operate up to 25,000 bottles per hour. The solution was further optimized with an inkjet printer for carton code printing, fully meeting NÖM's needs for an efficient and sustainable packaging system.
